

# EDMONDS

SPECIALIST JOINERY AND ARCHITECTURAL METALWORK

## STATION TICKET OFFICES

Edmonds specialise in the setting out, manufacture and installation of bespoke tube & station ticket offices. We carried out the initial prototype at Kings Cross in conjunction with Arup and have since completed numerous other stations to the same detail although we have incorporated design improvements. The contracts included the formation of stainless steel or bronze frontages, ballistic cash boxes, trespass & ergonomic counters and backfittings.

We have developed the updated LUL specifications for these ticket offices in conjunction with the design teams on these contracts which will now be applied throughout the Tube Station modernisation programme.

All items were bespoke with details being developed and produced by our in-house setting out department. If you have a tube station and require assistance please contact Mark Edmonds on 0121 236 8351
